

Documento Técnico Interno — CubeShackles, S.A.

1. Website-Ready Corporate Entities Page (full content)

This is the version you publish directly on biu-gholdings.org.

Corporate Structure of Biu-g Holdings LLC

A Global Holdings Architecture Built for Multi-Jurisdictional Scale

Biu-g Holdings LLC operates through a sovereign-grade, multi-layer structure spanning the United States, Portugal, and Angola. This architecture provides regulatory clarity, cross-border capital efficiency, IP protection, and long-term alignment with national institutions and African markets.

The Group is organized into eight strategic clusters, each with a distinct mandate across technology, finance, infrastructure, data, education, and fiduciary vehicles.

1. Top-Level U.S. Parent

Biu-g Holdings LLC (USA)

Global parent entity.

Holds all intellectual property, brand rights, and global ownership stakes — directly and through SGPS/participações structures.

Serves as the capital umbrella for all international and Angola-based operations.

2. Holdings & Participation Vehicles

Biu-g SGPS, Lda. (Portugal)

Portuguese SGPS holding.

Functions as the European equity vehicle and diversification structure.

Equity Role:

- Holds direct equity in CubeShackles, Inc. (USA)
 - Provides indirect exposure to CubeShackles, S.A. (Angola)
-

Biu-g SGPS, Lda. (Angola)

Angolan SGPS.

Equity Role:

- Owns 29% of Biu-g SGPS (Portugal)
 - Owns direct shares in CubeShackles, S.A. (Angola)
 - Provides AOA-native control and alignment with Angolan regulators & institutions
-

3. CubeShackles Group — Core Technology & National Infrastructure

CubeShackles, Inc. (Delaware C-Corp, USA)

Global technology and IP company.

Owns the SmartShackles Engine, DAG protocol, developer ecosystem, and global licensing.

Ownership Structure:

- Founders & retained — 47.10%
- Biu-g SGPS (Portugal) — 8.00%
- Pre-seed investors — 14.90%
- Future NASDAQ IPO investors — 20.00%
- Strategic Potential Investors — Vanguard, ARK, Circle, Coinbase, etc.
- Holds 25% of CubeShackles, S.A. (Angola)

CubeShackles, S.A. (Angola)

National operating company for the CubeShackles ecosystem.

Key Proposed Shareholders:

- CubeShackles, Inc. — 25.00%
- Unitel, Movitel, Africell
- Banco Nacional de Angola — 2.00%
- Opaia | Angola Capital Partners (FIPA) | Angola Telecom
- BFA Asset Mgmt / Kimbo Fund — 0.75%

- Ministério das Finanças — 2.00%
- Ministério dos Transportes — 2.00%
- Biu-g SGPS (Angola) — 6.15%
- Employees & Options — 12.00%
- BODIVA IPO Reserve — 25.00%
- Strategic Reserve — 5.00%

National Data Platform, Lda. (Angola)

—

Planned

Wholly owned by CubeShackles, S.A.

Holds sovereign-grade economic & social data (inflation, unemployment, informal markets, pricing indices, etc.).

Kulifikila Credit Bureau, Lda. (Angola)

—

Planned

Africa-first credit bureau for formal + informal sectors.

Operates the multi-layer AOA credit scoring rails.

Angola National Transit Platform (Lda. name TBD)

—

Planned

Runs the national transit application (drivers + riders).

Integrated with e-Kwanza, stable AOA, and National Token tax rails.

PraçaNgola, Lda. (Angola)

—

Planned

Angolan national e-commerce infrastructure.

Payments run through CubeShackles rails (e-Kz, stable AOA, National Token).

BualaBuitu Platform

—

Product today, Entity optional later

Angola's Bloomberg-equivalent financial terminal.

Currently housed inside CubeShackles, S.A.

4. FGM / FGMS Group — Investment & Financial Cluster

FGM Capital, Lda. (USA)

Original trading & capital entity.

Supports core capital markets strategy and early-stage operations.

Grupo FGMS & Associados, Lda. (Angola)

Planned

Ownership:

- Biu-g, SGPS, Lda. (Portugal) — 25%
 - Biu-g, SGPS, Lda. (Angola) — 29%
 - Remaining divisions allocated to employees and local investors.
-

Biu-g Investment Management, Lda. (Angola)

Planned

Mandate:

- 15 funds
 - Each capitalized with 100M AOA
 - Angola-only investments
 - Fully AOA-denominated
-

1975 Nzila, Lda. (Angola)

—

Planned

Local VC/PE + hospitality and brand experience arm.

Attached economically to FGMS or Investment Management.

FGMS & Co. (planned)

Real-estate operations (Angola & Portugal).

FGM & Co. (planned)

Co-investment, advisory & structuring SPV.

5. Mucho Dinero Group — Media & Technology Talent

Mucho Dinero Tecnologia, Lda. (Angola)

Innovation and national talent-development arm.

Supports CubeShackles, National Wallet, PraçaNgola, transit systems, etc.

Mucho Dinero Produção, Lda. (Angola)

Media, campaign & advertising production for all ecosystem brands.

6. Trusts & Fiduciary Vehicles

Fundo Fiduciário Estratégico (Angola)

Sovereign-grade fiduciary fund.

Purpose:

- Protect all Angolan subsidiaries
- Shield executives and workers
- Hold AOA-denominated interests on behalf of Biu-g Holdings

Representation through Sociedade de Participações BIU-G, Lda. (Angola).

Sango Trust — Planned

Long-term wealth, asset protection, succession engine.

7. Education & National Capacity Building

BIU.G Academy — Non-Profit

Educational backbone of the ecosystem.

Supports CubeShackles, National Wallet, Anglocoin, and financial literacy.

Now positioned under CubeShackles Global while brand control remains with Biu-g Holdings.

8. Additional Products (future legal entities)

These exist today as platforms, not companies — can be converted into SPVs:

- Biu-g Care (insurance)
 - CubeBank (digital bank)
 - CubePay (payments gateway)
 - CubeDex / CubeBourse (DEX + exchange layer)
 - CubeCloud / CubeQuantum (Africa-first compute layer)
 - Angola National Wallet (regulated national system)
-

B. Roll-Up View (Simplified Corporate Map)

1. Holdings Layer (equity umbrellas)

- Biu-g Holdings LLC (USA)
- Biu-g SGPS (Portugal & Angola)
- Sociedade de Participações BIU-G (Portugal & Angola)

2. Operating Platforms

- CubeShackles, Inc. (USA)
- CubeShackles, S.A. (Angola)
- FGMS & Associados, Lda.
- Biu-g Investment Management, Lda.
- Mucho Dinero Tecnologia, Lda.
- Mucho Dinero Produção, Lda.
- PraçaNgola Lda. (planned)
- Kulifikila Lda. (planned)
- National Data Platform Lda. (planned)

3. Trust & Non-Profit

- Fundo Fiduciário Estratégico

- Sango Trust (planned)
- BIU.G Academy (non-profit)

Em termos macro, a Biu-g Holdings LLC exerce controlo e direção estratégica
através de três pilares principais:

</p>

<div className="grid gap-4 md:grid-cols-3">

<div className="border border-gray-200 rounded-lg p-4 md:p-5 bg-white">

<h3 className="text-sm font-semibold text-gray-900 mb-2">

1. Holdings & SPVs

</h3>

<ul className="list-disc list-inside text-xs text-gray-600 space-y-1">

Biu-g Holdings LLC (EUA)

Biu-g SGPS (Portugal & Angola)

Sociedade de Participações BIU-G (Portugal & Angola)

</div>

<div className="border border-gray-200 rounded-lg p-4 md:p-5 bg-white">

<h3 className="text-sm font-semibold text-gray-900 mb-2">

2. Plataformas Operacionais

</h3>

<ul className="list-disc list-inside text-xs text-gray-600 space-y-1">

CubeShackles, Inc. (EUA)

CubeShackles, S.A. (Angola)

FGM Capital, Lda. (Portugal)

Grupo FGMS & Associados, Lda. (Angola)

Biu-g Investment Management, Lda. (Angola)

Mucho Dinero Tecnologia & Mucho Dinero Produção, Lda. (Angola)

National Data Platform, Kulifikila, PraçaNgola, 1975 Nzila, FGMS & Co,

FGM & Co (planeadas)

```

        </ul>

    </div>

    <div className="border border-gray-200 rounded-lg p-4 md:p-5 bg-white">

        <h3 className="text-sm font-semibold text-gray-900 mb-2">

            3. Trust & Impacto Social

        </h3>

        <ul className="list-disc list-inside text-xs text-gray-600 space-y-1">

            <li>Fundo Fiduciário Estratégico (Angola)</li>

            <li>Sango Trust (planeado)</li>

            <li>BIU.G Academy (sem fins lucrativos, sob CubeShackles Global)</li>

        </ul>

    </div>

</div>

</section>

</div>

</MainLayout>

);

}

```

Hook it up in Laravel/Inertia

```
// routes/web.php
```

```
use Inertia\Inertia;
```

```
Route::get('/estrutura-corporativa', function () {  
    return Inertia::render('CorporateStructurePt');  
})->name('corporate.structure.pt');
```

You now have:

- /corporate-structure → English
- /estrutura-corporativa → Portuguese

LanguageToggle.jsx

Create this file:

```
// resources/js/Components/LanguageToggle.jsx
```

```
import React from 'react';
```

```
import { Link, usePage } from '@inertiajs/react';
```

```
export default function LanguageToggle({
```

```
    enRoute = 'corporate.structure',
```

```
    ptRoute = 'corporate.structure.pt',
```

```
}) {
```

```
    const { url } = usePage();
```

```
    // crude check: if URL starts with /estrutura, assume PT; otherwise EN
```

```
    const isPt = url.startsWith('/estrutura');
```

```
    const isEn = !isPt;
```

```
return (  
  <div className="flex items-center gap-2 text-xs md:text-sm">  
    <Link  
      href={route(enRoute)}  
      className={  
        'px-2 py-1 rounded-full border transition ' +  
        (isEn  
          ? 'border-gray-900 bg-gray-900 text-white'  
          : 'border-gray-300 text-gray-600 hover:border-gray-500 hover:text-gray-800')  
        }  
    >  
      EN  
    </Link>  
    <Link  
      href={route(ptRoute)}  
      className={  
        'px-2 py-1 rounded-full border transition ' +  
        (isPt  
          ? 'border-gray-900 bg-gray-900 text-white'  
          : 'border-gray-300 text-gray-600 hover:border-gray-500 hover:text-gray-800')  
        }  
    >  
      PT
```

```

    </Link>

  </div>

);
}

```

Integrate in MainLayout header

Assuming your MainLayout.jsx has a top nav, add the toggle on the right.

```
// resources/js/Layouts/MainLayout.jsx
```

```

import React from 'react';

import { Link, usePage } from '@inertiajs/react';

import LanguageToggle from '@Components/LanguageToggle';

export default function MainLayout({ title, children }) {

  const { component } = usePage(); // Inertia component name if you need route awareness

  return (

    <div className="min-h-screen bg-gray-50 text-gray-900">

      <head>

        <title>{title || 'Biu-g Holdings LLC'}</title>

      </head>

      { /* Top Nav */ }

      <header className="border-b border-gray-200 bg-white">

        <div className="max-w-6xl mx-auto px-4 py-4 flex items-center justify-between gap-4">

```

```

    { /* Left: Logo + name */ }

    <div className="flex items-center gap-3">

        { /* Replace with real logo */ }

        <div className="h-8 w-8 rounded-full border border-gray-900 flex items-center
justify-center text-[10px] font-bold tracking-tight">

            BG

        </div>

        <div className="flex flex-col leading-tight">

            <span className="text-sm font-semibold">Biu-g Holdings LLC</span>

            <span className="text-xs text-gray-500">

                Corporate Infrastructure for Africa

            </span>

        </div>

    </div>

    { /* Center: Navigation (example) */ }

    <nav className="hidden md:flex items-center gap-6 text-xs font-medium text-gray-700">

        <Link href={route('home')} className="hover:text-gray-900">

            Home

        </Link>

        <Link href={route('about')} className="hover:text-gray-900">

            About

        </Link>

        <Link

            href={route('corporate.structure')}

```

```

        className="hover:text-gray-900"

    >

    Corporate Structure

</Link>

    {/* add more as needed */}

</nav>

    {/* Right: Language toggle */}

    <div className="flex items-center gap-3">

        <LanguageToggle

            enRoute="corporate.structure"

            ptRoute="corporate.structure.pt"

        />

    </div>

</div>

</header>

    {/* Page Content */}

    <main className="pb-16">{children}</main>

    {/* Simple footer */}

    <footer className="border-t border-gray-200 bg-white">

        <div className="max-w-6xl mx-auto px-4 py-4 text-xs text-gray-500 flex justify-between">

            <span>© {new Date().getFullYear()} Biu-g Holdings LLC</span>

```

```
        <span>All rights reserved.</span>

    </div>

</footer>

</div>

);

}
```

Adjust route names if yours are different.

Make sure routes are registered

You already saw this pattern, but here it is clean:

```
// routes/web.php
```

```
use Inertia\Inertia;
```

```
Route::get('/corporate-structure', function () {
    return Inertia::render('CorporateStructure');
})->name('corporate.structure');
```

```
Route::get('/estrutura-corporativa', function () {
    return Inertia::render('CorporateStructurePt');
})->name('corporate.structure.pt');
```

Now you have:

- Full EN + PT corporate structure pages

- Single LanguageToggle component wired into your layout
- Clear UX for regulators, investors, and partners landing on the site

Global Locale-Aware LanguageToggle

This version doesn't hardcode "corporate.structure" anymore.

It uses the Inertia component name and a central mapping to jump between EN/PT routes for each page.

```
// resources/js/Components/LanguageToggle.jsx
```

```
import React from 'react';
```

```
import { Link, usePage } from '@inertiajs/react';
```

```
const PAGE_LOCALE_ROUTE_MAP = {
```

```
  // Corporate Structure
```

```
  CorporateStructure: {
```

```
    en: 'corporate.structure',
```

```
    pt: 'corporate.structure.pt',
```

```
  },
```

```
  CorporateStructurePt: {
```

```
    en: 'corporate.structure',
```

```
    pt: 'corporate.structure.pt',
```

```
  },
```

```
  // Home
```

```
  Home: {
```

```
    en: 'home',  
    pt: 'home.pt',  
  },  
  HomePt: {  
    en: 'home',  
    pt: 'home.pt',  
  },
```

```
// About
```

```
About: {  
  en: 'about',  
  pt: 'about.pt',  
},
```

```
AboutPt: {  
  en: 'about',  
  pt: 'about.pt',  
},
```

```
// Add more pages as you create them:
```

```
// Leadership / Subsidiaries / Investments / Contact...
```

```
// Leadership: { en: 'leadership', pt: 'leadership.pt' },
```

```
// LeadershipPt: { en: 'leadership', pt: 'leadership.pt' },
```

```
};
```

```
export default function LanguageToggle() {

  const { url, component } = usePage();

  const pageConfig = PAGE_LOCALE_ROUTE_MAP[component];

  // If page not mapped, hide toggle (safety)
  if (!pageConfig) return null;

  const isPt = url.startsWith('/pt') || url.startsWith('/estrutura');
  const isEn = !isPt;

  return (
    <div className="flex items-center gap-2 text-xs md:text-sm">
      { /* EN */ }
      <Link
        href={route(pageConfig.en)}
        className={
          'px-2 py-1 rounded-full border transition ' +
          (isEn
            ? 'border-gray-900 bg-gray-900 text-white'
            : 'border-gray-300 text-gray-600 hover:border-gray-500 hover:text-gray-800')
        }
      >
        EN
      </Link>
    </div>
  )
}
```

```

</Link>

{/* PT */}

<Link
  href={route(pageConfig.pt)}
  className={
    'px-2 py-1 rounded-full border transition ' +
    (isPt
      ? 'border-gray-900 bg-gray-900 text-white'
      : 'border-gray-300 text-gray-600 hover:border-gray-500 hover:text-gray-800')
  }
>
  PT
</Link>
</div>

);
}

```

How this works:

- Inertia exposes component → CorporateStructure, CorporateStructurePt, Home, HomePt, etc.
- We map each component name to its EN/PT route names.
- Toggle always knows “what is the twin page” for the current screen.
- If a new page is added, you just add two lines to PAGE_LOCALE_ROUTE_MAP.

Route Naming Convention (EN + PT)

Standardize everything like this:

```
// routes/web.php
```

```
use Inertia\Inertia;
```

```
/**
```

```
 * HOME
```

```
 */
```

```
Route::get('/', function () {
```

```
    return Inertia::render('Home');
```

```
})->name('home');
```

```
Route::get('/pt', function () {
```

```
    return Inertia::render('HomePt');
```

```
})->name('home.pt');
```

```
/**
```

```
 * ABOUT
```

```
 */
```

```
Route::get('/about', function () {
```

```
    return Inertia::render('About');
```

```
})->name('about');
```

```
Route::get('/sobre', function () {
```

```

    return Inertia::render('AboutPt');
  }->name('about.pt');

  /**
   * CORPORATE STRUCTURE
   */

  Route::get('/corporate-structure', function () {
    return Inertia::render('CorporateStructure');
  }->name('corporate.structure');

```

```

Route::get('/estrutura-corporativa', function () {
  return Inertia::render('CorporateStructurePt');
})->name('corporate.structure.pt');

```

Pattern is predictable:

- EN: name = xxx, component = Xxx
- PT: name = xxx.pt, component = XxxPt
- Slugs can be English (/about) or Portuguese (/sobre) — doesn't matter, mapping is via route names.

Hook LanguageToggle into MainLayout (already mostly done)

If you already added the first version, just swap to this new one (same import):

```
// resources/js/Layouts/MainLayout.jsx
```

```
import React from 'react';
```

```

import { Link } from '@inertiajs/react';

import LanguageToggle from '@Components/LanguageToggle';

export default function MainLayout({ title, children }) {
  return (
    <div className="min-h-screen bg-gray-50 text-gray-900">
      <head>
        <title>{title || 'Biu-g Holdings LLC'}</title>
      </head>

      <header className="border-b border-gray-200 bg-white">
        <div className="max-w-6xl mx-auto px-4 py-4 flex items-center justify-between gap-4">
          { /* Left: Logo */ }

          <div className="flex items-center gap-3">
            <div className="h-8 w-8 rounded-full border border-gray-900 flex items-center justify-center text-[10px] font-bold tracking-tight">
              BG
            </div>

            <div className="flex flex-col leading-tight">
              <span className="text-sm font-semibold">Biu-g Holdings LLC</span>
              <span className="text-xs text-gray-500">

Governance Philosophy

</h2>

<p className="text-sm text-gray-600">

Governance at Biu-g Holdings is designed around clear lines of accountability, jurisdictional rigor and multi-decade continuity. As the group onboards independent directors, institutional partners and strategic advisors, governance will formalize into:

</p>

<ul className="list-disc list-inside text-sm text-gray-600 space-y-1">

A holdings-level board at Biu-g Holdings LLC (USA).

Jurisdiction-specific boards for Portugal and Angola entities.

Specialized committees across risk, audit, technology and compensation.

Formal channels for regulator and institutional partner engagement.

<p className="text-sm text-gray-600">

The objective is straightforward: ensure every core platform — CubeShackles, FGMS, PraçaNgola, National Data Platform, BIU.G Academy — operates with the same level of discipline expected from global institutions, while remaining anchored in Angola's realities.

Routes wiring

Add to routes/web.php:

```
use Inertia\Inertia;
```

```
// SUBSIDIARIES / PORTFOLIO
```

```
Route::get('/subsidiaries', function () {

    return Inertia::render('Subsidiaries');

})->name('subsidiaries');
```

```
Route::get('/subsidiarias', function () {

    return Inertia::render('SubsidiariesPt');

})->name('subsidiaries.pt');
```

Language toggle map

In LanguageToggle.jsx, extend PAGE_LOCALE_ROUTE_MAP:

```
Subsidiaries: {  
  en: 'subsidiaries',  
  pt: 'subsidiaries.pt',  
},  
SubsidiariesPt: {  
  en: 'subsidiaries',  
  pt: 'subsidiaries.pt',  
},
```

Optional: add to top nav

In MainLayout.jsx:

```
<nav className="hidden md:flex items-center gap-6 text-xs font-medium text-gray-700">  
  <Link href={route('home')} className="hover:text-gray-900">

docs/site-architecture.md

for your CTO

Here's a markdown doc they can drop into docs/site-architecture.md:

```
# Biu-g Holdings Corporate Site Architecture
```

This document summarizes the high-level architecture and conventions for the
`biu-gholdings.org`

corporate website.

```
---
```

1. Tech Stack

- **Backend:** Laravel + Inertia.js
- **Frontend:** React (SPA-style pages rendered by Inertia)
- **Styling:** Tailwind-style utility classes (via Laravel/Tailwind stack)
- **Routing:** Laravel `routes/web.php` → Inertia `render('ComponentName')`

The site is intentionally **bilingual (EN/PT)**, with a predictable naming convention for pages and

routes.

2. Language & Routing Conventions

Each public page exists in **two variants**:

- English component: `ComponentName.jsx`
- Portuguese component: `ComponentNamePt.jsx`

Route naming:

- English route: `name('slug')`
- Portuguese route: `name('slug.pt')`

Examples:

```
```php
```

```
// Home
```

```
Route::get('/', fn () => Inertia::render('Home'))->name('home');
```

```
Route::get('/pt', fn () => Inertia::render('HomePt'))->name('home.pt');
```

```
// About
```

```
Route::get('/about', fn () => Inertia::render('About'))->name('about');
```

```
Route::get('/sobre', fn () => Inertia::render('AboutPt'))->name('about.pt');
```

Slugs can differ (/about vs /sobre); the invariant is the route name and the .pt suffix.

---

### 3. Global Language Toggle

Component: resources/js/Components/LanguageToggle.jsx

- Uses `usePage()` from Inertia to read:
  - `component` → current React component (e.g. Home, HomePt, About).
  - `url` → current URL (used as a secondary signal).
- Maintains a central mapping:

```
const PAGE_LOCALE_ROUTE_MAP = {

 Home: { en: 'home', pt: 'home.pt' },

 HomePt: { en: 'home', pt: 'home.pt' },

 About: { en: 'about', pt: 'about.pt' },

 AboutPt: { en: 'about', pt: 'about.pt' },

 // ...

};
```

The toggle:

- Detects the current component.
- Looks up the EN/PT route pair.
- Renders two buttons: EN and PT.
- If a page is not in the mapping, the toggle hides itself (safe default).

Developer rule: whenever a new page is added, update:

1. routes/web.php with EN/PT routes
  2. LanguageToggle.jsx PAGE\_LOCALE\_ROUTE\_MAP with the corresponding component names
- 

## 4. Page Inventory

Current (planned) pages:

### Public Core

- Home.jsx / HomePt.jsx
- About.jsx / AboutPt.jsx
- Leadership.jsx / LeadershipPt.jsx
- CorporateStructure.jsx / CorporateStructurePt.jsx
- Subsidiaries.jsx / SubsidiariesPt.jsx
- InvestorRelations.jsx / InvestorRelationsPt.jsx
- Contact.jsx / ContactPt.jsx

All pages are wrapped with:

```
<MainLayout title="...">

 {/* page content */

</MainLayout>
```

### Contact Page (EN)

File: resources/js/Pages/Contact.jsx

```
import React from 'react';

);

}

## Routes: Contact + IR (EN/PT)

Add these to routes/web.php:

```
use Inertia\Inertia;
```

```
// CONTACT
```

```
Route::get('/contact', function () {
 return Inertia::render('Contact');
})->name('contact');
```

```
Route::get('/contacto', function () {
 return Inertia::render('ContactPt');
})->name('contact.pt');
```

```
// INVESTOR RELATIONS
```

```
Route::get('/investor-relations', function () {
 return Inertia::render('InvestorRelations');
})->name('ir');
```

```
Route::get('/relacoes-com-investidores', function () {
 return Inertia::render('InvestorRelationsPt');
})->name('ir.pt');
```

## LanguageToggle map updates

In resources/js/Components/LanguageToggle.jsx, extend PAGE\_LOCALE\_ROUTE\_MAP:

```
Contact: {
 en: 'contact',
 pt: 'contact.pt',
},
```

```
ContactPt: {
 en: 'contact',
 pt: 'contact.pt',
},
```

```
InvestorRelations: {
 en: 'ir',
 pt: 'ir.pt',
},
```

```
InvestorRelationsPt: {
```

```
en: 'ir',
pt: 'ir.pt',
},
```

## Optional: Add to top nav

In MainLayout.jsx navigation:

```
<nav className="hidden md:flex items-center gap-6 text-xs font-medium text-gray-700">
```

```
 <Link href={route('home')} className="hover:text-gray-900">
```

```
 Home
```

```
 </Link>
```

```
 <Link href={route('about')} className="hover:text-gray-900">
```

```
 About
```

```
 </Link>
```

```
 <Link href={route('leadership')} className="hover:text-gray-900">
```

```
 Leadership
```

```
 </Link>
```

```
 <Link href={route('corporate.structure')} className="hover:text-gray-900">
```

```
 Corporate Structure
```

```
 </Link>
```

```
 <Link href={route('subsidiaries')} className="hover:text-gray-900">
```

```
 Subsidiaries
```

```
 </Link>
```

```
 <Link href={route('ir')} className="hover:text-gray-900">
```

```
 Investors
```

```
 </Link>
```

```
<Link href={route('contact')} className="hover:text-gray-900">
```

Contact

```
</Link>
```

```
</nav>
```

## Internal Documentation:

### docs/site-architecture.md

File: docs/site-architecture.md

# Biu-g Holdings Corporate Website – Architecture Overview

This document describes the front-end and routing architecture for **biu-gholdings.org**, implemented with **Laravel + Inertia + React** and a **bilingual EN/PT** structure.

---

#### ## 1. Technology Stack

- **Backend Framework:** Laravel
- **Frontend:** React via Inertia.js
- **Styling:** Tailwind-style utility classes
- **Language Handling:** Route-based (EN/PT pairs) with a shared `LanguageToggle` component

The site is intentionally **static-first**: all core corporate content is React pages rendered via Inertia, with no hard dependency on external APIs for initial launch.

---

## ## 2. Routing & Bilingual Convention

Each public page exists as an **\*\*EN/PT pair\*\***:

- React components:

- `PageName.jsx` (English)
- `PageNamePt.jsx` (Portuguese)

- Laravel route names:

- EN: `page.name`
- PT: `page.name.pt`

- Slugs:

- EN: English-friendly slug (e.g. `/about`, `/investor-relations`)
- PT: Portuguese-friendly slug (e.g. `/sobre`, `/relacoes-com-investidores`)

**\*\*Examples:\*\***

```
```php
```

```
// Home
```

```
Route::get('/', fn () => Inertia::render('Home'))->name('home');
```

```
Route::get('/pt', fn () => Inertia::render('HomePt'))->name('home.pt');
```

```
// About
```

```
Route::get('/about', fn () => Inertia::render('About'))->name('about');
```

```
Route::get('/sobre', fn () => Inertia::render('AboutPt'))->name('about.pt');
```

Layout Structure

All pages share a single top-level layout:

- File: resources/js/Layouts/MainLayout.jsx
- Responsibilities:
 - `<head><title /></head>` handling
 - Top navigation (Home, About, Leadership, Corporate Structure, Subsidiaries, Investors, Contact)
 - Logo + tagline block
 - Global LanguageToggle on the right side of the header
 - Shared footer

Page components only handle page-specific content.

Language Toggle

File: resources/js/Components/LanguageToggle.jsx

- Uses `usePage()` from Inertia to read:
 - `component` → Inertia page component name (e.g. Home, HomePt, CorporateStructure)
 - `url` → current URL

- Maintains a central map:

```
const PAGE_LOCALE_ROUTE_MAP = {  
  
  Home: { en: 'home', pt: 'home.pt' },  
  
  HomePt: { en: 'home', pt: 'home.pt' },  
  
  About: { en: 'about', pt: 'about.pt' },  
  
  AboutPt: { en: 'about', pt: 'about.pt' },  
  
  // ...  
  
};
```

- Renders a simple EN/PT toggle:
 - Active locale is highlighted based on url.
 - If the current component is not in the map, the toggle is hidden (safety default).

Dev rule:

Whenever a new page is added (e.g. Regulators / RegulatorsPt), the engineer must:

1. Add the Inertia components.
2. Add EN/PT routes with .pt suffix for PT.
3. Add both component names to PAGE_LOCALE_ROUTE_MAP.

Current Page Inventory (Initial Version)

Core:

- Home.jsx / HomePt.jsx
- About.jsx / AboutPt.jsx
- Leadership.jsx / LeadershipPt.jsx

- CorporateStructure.jsx / CorporateStructurePt.jsx
- Subsidiaries.jsx / SubsidiariesPt.jsx
- InvestorRelations.jsx / InvestorRelationsPt.jsx
- Contact.jsx / ContactPt.jsx

All pages follow the same pattern:

- Import MainLayout.
- Wrap content in `<MainLayout title="..."> ... </MainLayout>`.
- Use Tailwind-like utility classes for layout and typography.
- Write copy in institutional, regulator-friendly tone.

Forms & Interactivity

Contact Form

- File: Contact.jsx / ContactPt.jsx
- Status: Frontend-only placeholder for launch.
- Fields: name, email, organization, topic, message.
- Button: `type="button"` (no submission yet).
- Disclaimer text clarifies that the form does not constitute any offer or commitment.

Future upgrade path:

- Convert to `type="submit"`.
- Wire to:
 - Laravel controller endpoint (e.g. POST /contact).

- Validation, spam protection.
- Optional queue-backed email notifications.

Content Principles

1. Institutional Tone:

All copy is written for regulators, banks, telecom operators, institutional investors, and government, not retail users.

2. Clarity on Status:

Each entity is tagged as Active, In Formation, or Planned to avoid misrepresentation.

3. No Offers / No Solicitation:

Investor Relations pages include explicit disclaimers that nothing on the site is an offer or

solicitation of securities.

4. Jurisdictional Transparency:

Entities and descriptions clearly indicate their jurisdiction (USA, Portugal, Angola).

Extension Playbook

When adding a new section (e.g. “Regulators & Compliance”, “Media Center”):

1. Define EN/PT copy.

2. Create:

- Regulators.jsx
- RegulatorsPt.jsx

3. Add routes:

- /regulators → Regulators → regulators
 - /reguladores → RegulatorsPt → regulators.pt
4. Register components in PAGE_LOCALE_ROUTE_MAP.
 5. Add link to top nav (if it is a primary section) or secondary nav on relevant pages.

Governance & Ownership of the Site

- Business Owner: Biu-g Holdings LLC (corporate HQ).
- Technical Owner: CTO / engineering responsible for CubeShackles + web properties.
- Copy Owner: Executive Chairman / Sovereign Architect + IR function.

All structural changes (new sections, changes to entity descriptions, new jurisdictions) should be reviewed by:

1. Corporate / legal (for accuracy and regulatory implications).
2. IR / strategy (for messaging consistency).

This architecture is intentionally simple, robust and easy to extend while the group is in pre-launch. It can be progressively enhanced with:

- Auth and investor portals.
- Regulator-specific dashboards.
- Document libraries (PDFs, presentations, term sheets).
- Dynamic data sourced from the CubeShackles ecosystem.
