

Documento Técnico Interno — CubeShackles, S.A.

README.md

Biu-g Holdings LLC — Corporate Website

biu-gholdings.org

Overview

The official corporate website for Biu-g Holdings LLC, serving as the institutional gateway to all group entities across the United States, Portugal, and Angola.

The platform is designed as a static-first, bilingual (EN/PT) website built with:

- Laravel (Backend)
- Inertia.js (Server-side rendering bridge)
- React (Frontend)
- TailwindCSS utility classes

This repository delivers a clean, maintainable, regulator-friendly architecture for presenting:

- Corporate governance
- Leadership

- Global corporate structure
- Subsidiaries & business clusters
- Investor Relations
- Strategic contact channels

No dynamic data or authentication is required for the initial pre-launch phase.

Tech Stack

Backend

- PHP 8+
- Laravel 10
- Inertia.js (Laravel adapter)

Frontend

- React 18
- Inertia React adapter
- Tailwind utility-first styling

Additional

- Node.js 18+
 - npm / pnpm / yarn
 - Vite (bundler)
-

Repository Structure

```
/app  
/bootstrap  
/config  
/public  
/resources  
  /js  
    /Layouts  
    /Pages  
    /Components  
  /css  
/routes  
  web.php  
/docs  
  site-architecture.md
```

Project Architecture

The site is designed around a disciplined, bilingual page model:

English component: PageName.jsx

Portuguese component: PageNamePt.jsx

Each page pair has equivalent:

- Routing
- SEO metadata
- Layout structure

This ensures perfect EN/PT symmetry across the entire corporate domain.

Core Layout

MainLayout.jsx

The shared layout used by all pages:

- Top navigation
- Language toggle
- Hero/header containers
- Footer
- SEO <title> injection

LanguageToggle.jsx

Handles language switching by mapping Inertia page names to EN/PT route pairs.

Routing Architecture

All routes follow a strict EN/PT pairing convention:

/page → English

/page-pt or /pt-page → Portuguese

Example

// About

Route::get('/about', fn () => Inertia::render('About'))->name('about');

Route::get('/sobre', fn () => Inertia::render('AboutPt'))->name('about.pt');

Full list:

Static Pages

English	Portuguese	Component (EN/PT)
/	/pt	Home / HomePt

/about	/sobre	About / AboutPt
/leadership	/lideranca	Leadership / LeadershipPt
/corporate-structure	/estrutura-corporativa	CorporateStructure / CorporateStructurePt
/subsidiaries	/subsidiarias	Subsidiaries / SubsidiariesPt
/investor-relations	/relacoes-com-investidores	InvestorRelations / InvestorRelationsPt
/contact	/contacto	Contact / ContactPt

Pages Included

1. Home

Positioning of Biu-g Holdings: global umbrella, sovereign infrastructure builder, multi-jurisdiction control.

2. About

Mission, vision, long-term strategic alignment (USA → PT → Angola triangle).

3. Leadership

Founder, CTO, and governance philosophy.

4. Corporate Structure

Full multi-entity hierarchy reflecting:

- Biu-g Holdings LLC (USA)
- Biu-g SGPS (Portugal & Angola)
- CubeShackles, Inc. & S.A.
- FGMS / FGM / Biu-g Investment Management
- Mucho Dinero cluster
- Trust / Fiduciary structures
- BIU.G Academy

5. Subsidiaries / Ecosystem

Visual representation of each operating company and cluster.

6. Investor Relations

Capital structure, regulatory disclaimers, investor alignment principles.

7. Contact

Strategic communication channel for:

- Regulators
 - Telecoms
 - Banks
 - Institutional investors
 - Government entities
-

Developer Guide

This is what the CTO and developers must follow when extending the site.

Bilingual Page Pattern

Every page added to the site must include:

Two React components

Page.jsx
PagePt.jsx

Two routes

page
[page.pt](#)

Two entries in LanguageToggle map

Page: { en: 'page', pt: 'page.pt' }
PagePt: { en: 'page', pt: 'page.pt' }

This guarantees full structural symmetry and avoids localization drift.

Adding a New Page (Required Steps)

1. Create EN React page

resources/js/Pages/NewPage.jsx

2. Create PT React page

resources/js/Pages/NewPagePt.jsx

3. Add routes

```
Route::get('/new-page', fn() => Inertia::render('NewPage'))->name('new.page');  
Route::get('/nova-pagina', fn() => Inertia::render('NewPagePt'))->name('new.page.pt');
```

4. Register in

LanguageToggle.jsx

```
NewPage: { en: 'new.page', pt: 'new.page.pt' },  
NewPagePt: { en: 'new.page', pt: 'new.page.pt' },
```

5. Add nav item (optional)

MainLayout.jsx

Local Development

Install dependencies

```
composer install  
npm install
```

Run dev server

```
php artisan serve  
npm run dev
```

Production Build

```
npm run build  
php artisan optimize
```

Governance Principles

This website follows strict institutional guidelines:

- No solicitation of offers
- No financial promotion
- Clear jurisdiction labeling
- Clear entity classification (Active / In Formation / Planned)
- High-trust language for regulators and strategic partners

All future additions (e.g., Media Center, Regulator Portal, Investor Document Library) must follow this discipline.

Deployment Notes

- Deployable via Laravel Forge, Docker, AWS, DigitalOcean, or bare metal.
 - Zero-database dependency in this version
 - Cloudflare recommended for security + caching
 - Static-first = extremely low hosting cost
-

Final Note

This repository is the official corporate gateway to the entire Biu-g ecosystem.

It must always reflect:

- Institutional discipline
- Regulatory alignment
- Sovereign clarity
- Zero ambiguity

Every update must be reviewed against the group's long-term governance principles.

1. docs/site-architecture.md (FINAL)

Biu-g Holdings Corporate Website

Site Architecture Documentation

Version 1.0 — January 2025

1. Purpose

This document defines the **technical, architectural, and structural conventions** for the corporate website at:

...

<https://biu-g Holdings.org>

...

It ensures consistency across all pages, clear bilingual conventions (EN/PT), and a stable developer onboarding process for the CTO and contributors.

2. Technology Stack

Backend

- Laravel 10
- PHP 8+
- Inertia.js (Laravel adapter)

Frontend

- React 18
- Inertia React Adapter

- TailwindCSS utility classes
- Vite bundler

Infrastructure (Recommended)

- Nginx or Apache
- Cloudflare CDN + security
- GitHub Actions for CI/CD (optional)
- Docker-compatible

3. Architectural Philosophy

The design is:

- **Static-first**
- **Zero backend dependency for initial launch**
- **Regulator-friendly**
- **Investor-ready**
- **Fully bilingual (EN/PT)**
- **Long-term scalable** for dashboards, documents, and portals

The architecture must remain:

- Predictable
- Auditable
- Simple to maintain
- Traceable across jurisdictions

4. Bilingual Page Model

Each public page has an English and Portuguese version.

File Pattern

...

Page.jsx

PagePt.jsx

...

Route Pattern

...

page

```
page.pt
...
```

```
### Example
...
```

```
About.jsx
AboutPt.jsx
```

```
/about
/sobre
...
```

```
### LanguageToggle Mapping
Each page pair must be added to:
```

```
...
resources/js/Components/LanguageToggle.jsx
...
```

Mapping example:

```
```js
About: { en: 'about', pt: 'about.pt' },
AboutPt: { en: 'about', pt: 'about.pt' },
...
```

```

```

## ## 5. Directory Structure

```
...
resources/
 js/
 Layouts/
 MainLayout.jsx
 Components/
 LanguageToggle.jsx
 Pages/
 Home.jsx
 HomePt.jsx
 About.jsx
 AboutPt.jsx
 Leadership.jsx
 LeadershipPt.jsx
```

- CorporateStructure.jsx
- CorporateStructurePt.jsx
- Subsidiaries.jsx
- SubsidiariesPt.jsx
- InvestorRelations.jsx
- InvestorRelationsPt.jsx
- Contact.jsx
- ContactPt.jsx

docs/

- site-architecture.md
- cto-checklist.md
- deployment-guide.md
- sitemap-diagram.md
- content-governance.md

routes/

- web.php

...

---

## ## 6. Frontend Layout System

### ### Main Layout

- `/resources/js/Layouts/MainLayout.jsx`
- Applies to all pages
- Contains:
  - Header
  - Navigation
  - Language toggle
  - Footer
  - Title injection
  - Consistent whitespace and typography

### ### Components

- LanguageToggle.jsx
- Future: Footer.jsx, Nav.jsx, etc.

---

## ## 7. Page Inventory (Phase 1 Launch)

### ### \*\*Corporate Pages\*\*

- Home / HomePt
- About / AboutPt

- Leadership / LeadershipPt
- CorporateStructure / CorporateStructurePt
- Subsidiaries / SubsidiariesPt

#### ### \*\*Stakeholder Pages\*\*

- InvestorRelations / InvestorRelationsPt
- Contact / ContactPt

---

### ## 8. Future Expansion (Phase 2)

- Media Center
- Document Library (PDFs, annual letters, decks)
- Regulator Portal
- Investor Portal
- Careers Page
- Governance Hub (charters, bylaws, board docs)

---

### ## 9. Compliance

This site must always reflect:

- No solicitation of offers
- No misrepresentation of corporate entities
- Clear indication of jurisdiction and status
- Institutional tone
- Consistency with regulatory norms in:
  - USA
  - EU
  - Angola

---

### ## 10. Governance

- All changes require review by Executive Chairman + CTO
- All public-facing content must be approved by:
  - Strategy
  - IR
  - Corporate
- Page additions must maintain EN/PT pairing

## 2. docs/cto-checklist.md

# CTO Execution Checklist

## Biu-g Holdings Corporate Website

This checklist defines the exact steps the CTO must execute for a clean, compliant build.

---

### ## 1. Environment Setup

### Install dependencies

...

composer install

npm install

...

### Run development servers

...

php artisan serve

npm run dev

...

---

### ## 2. Implement Base Layout

- [ ] Setup `MainLayout.jsx`
- [ ] Add top navigation
- [ ] Add footer (even minimal)
- [ ] Implement `LanguageToggle.jsx`
- [ ] Configure `` injection via props</li></ul></div><div data-bbox="112 709 138 720" data-label="Text"><p>---</p></div><div data-bbox="111 740 304 758" data-label="Section-Header"><h3>## 3. Configure Routes</h3></div><div data-bbox="111 777 245 795" data-label="Text"><p>For every page:</p></div><div data-bbox="111 813 452 868" data-label="List-Group"><ul><li>- [ ] English route</li><li>- [ ] Portuguese route</li><li>- [ ] Route names (ex: `about` / `about.pt`)</li></ul></div><div data-bbox="111 887 417 905" data-label="Text"><p>Update `routes/web.php` accordingly.</p></div>

---

## ## 4. Create Bilingual Page Pairs

For each page:

- [ ] Page.jsx (EN)
- [ ] PagePt.jsx (PT)

Pages to implement:

- [ ] Home
- [ ] About
- [ ] Leadership
- [ ] Corporate Structure
- [ ] Subsidiaries
- [ ] Investor Relations
- [ ] Contact

---

## ## 5. Language Toggle Map

For every new EN/PT pair:

- [ ] Update `PAGE\_LOCALE\_ROUTE\_MAP`
- [ ] Test route switching
- [ ] Test direct URL navigation

---

## ## 6. Styling Consistency

- [ ] Use Tailwind utility classes only
- [ ] Consistent spacing (`py-12 px-4`)
- [ ] Consistent typography
- [ ] Consistent section patterns

---

## ## 7. Launch Checklist

- [ ] ESLint passes

- [ ] Vite compiles with no warnings
- [ ] 404 page returns correctly
- [ ] Canonical URLs OK
- [ ] Titles consistent
- [ ] Language toggle functional
- [ ] Zero backend dependencies

---

### ## 8. Production Build

...

```
npm run build
php artisan optimize
php artisan route:cache
php artisan config:cache
...
```

---

### ## 9. Deployment

- [ ] Deploy on server/Forge/Docker
- [ ] Set file permissions
- [ ] Configure Cloudflare
- [ ] Add SSL
- [ ] Redirect `www` → root domain

---

### ## 10. Maintenance Model

- [ ] EN/PT parity required
- [ ] All new pages follow bilingual structure
- [ ] All content updates approved by strategy/IR

## 3. docs/deployment-guide.md

# Deployment Guide

## Biu-g Holdings Corporate Website

This guide defines the production deployment process.

---

## ## 1. Recommended Infrastructure

#### Best option (secure + global):

- \*\*Cloudflare\*\* (DNS + CDN + Firewall)
- \*\*Laravel Forge\*\* or \*\*Docker\*\*
- \*\*Ubuntu 22.04\*\*
- \*\*Nginx\*\*
- \*\*PHP 8.2\*\*
- \*\*Node 18\*\*

#### Alternative:

- AWS (EC2 + S3 + CloudFront)
- DigitalOcean Droplet

---

## ## 2. Deployment Steps

#### Step 1 — Clone Repo

...

```
git clone https://github.com/biu-g/biu-gholdings.git
```

...

#### Step 2 — Install Backend Dependencies

...

```
composer install
```

```
php artisan key:generate
```

...

#### Step 3 — Install Frontend Dependencies

...

```
npm install
```

```
npm run build
```

...

#### Step 4 — Optimize Laravel

...

```
php artisan optimize
```

```
php artisan route:cache
```

```
php artisan config:cache
```

...

### ### Step 5 — Configure Web Server

#### Nginx example:

...

root /var/www/biu-g Holdings/public;

index index.php index.html;

```
location / {
 try_files $uri $uri/ /index.php?$query_string;
}
```

```
location ~ \.php$ {
 include fastcgi.conf;
 fastcgi_pass unix:/var/run/php/php8.2-fpm.sock;
}
...
```

---

### ## 3. Cloudflare Setup

1. Add domain to Cloudflare
2. Enable:
  - Proxy (orange cloud)
  - SSL full/strict
  - WAF basic rules
3. Set caching level: \*Standard\*
4. Add page rules:
  - Always use HTTPS
  - Cache static assets

---

### ## 4. Post-Deployment Checks

- [ ] Language toggle works globally
- [ ] All pages load <150ms with Cloudflare
- [ ] No console errors
- [ ] All EN/PT routes functioning
- [ ] Title + meta tags correct

---

## ## 5. Zero Downtime Deployment

If using Forge:

- Automatic Nginx reloads
- Zero downtime via symlink releases
- Atomic deploy strategy

If using Docker:

- Rolling container updates
- Health checks via `nginx -t`

# 4. docs/sitemap-diagram.md

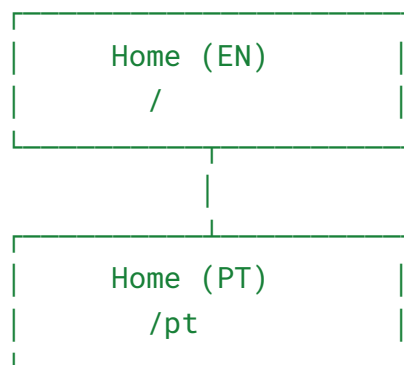

## # Biu-g Holdings Website - Sitemap Diagram

This diagram reflects the final route structure and is ready for Figma import.

---

### ## 1. High-Level Map

...

...

### ### Primary Pages

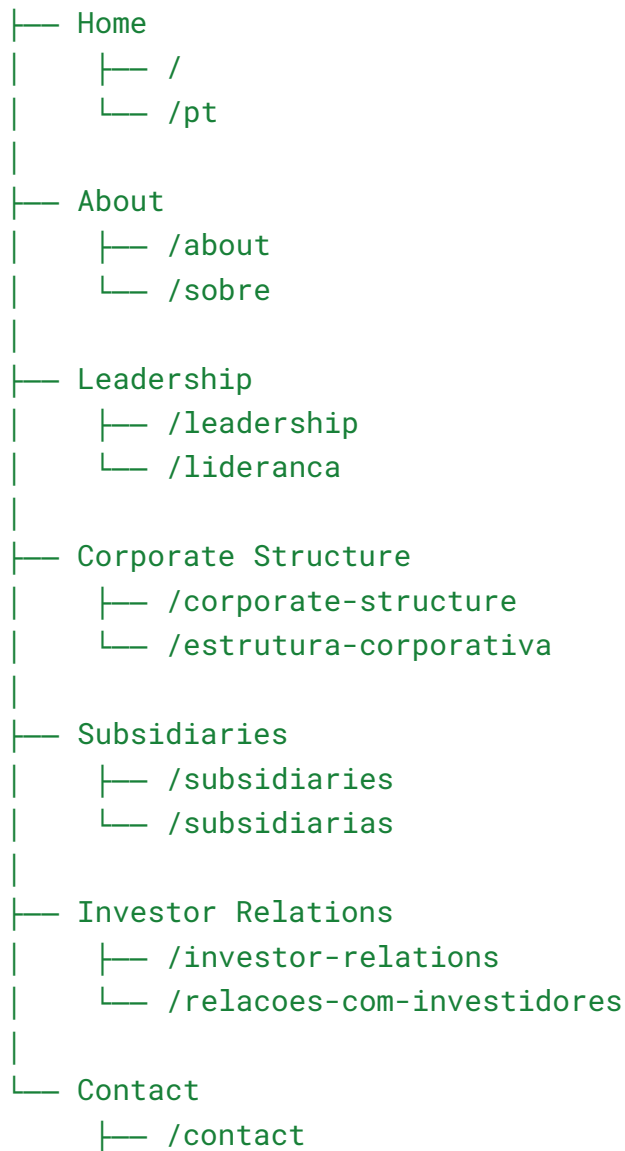

...

/about	/sobre
/leadership	/lideranca
/corporate-structure	/estrutura-corporativa
/subsidiaries	/subsidiarias
/investor-relations	/relacoes-com-investidores
/contact	/contacto
...	

### ### Diagram (Full Tree)

...

ROOT

└─ /contacto  
...

---

## ## 2. Figma Import Notes

- Use a grid of 3 columns × 4 rows
  - Each page = single frame
  - Connect EN ↔ PT with toggles
  - Use corporate colors:
    - Dark Gray: `#111111`
    - Soft Gray: `#6B7280`

---

## ## 3. Versioning

- Sitemap v1 – January 2025

---

# 5. docs/content-governance.md

# Content Governance

## For Biu-g Holdings Corporate Web Properties

This document defines rules for maintaining the site in full alignment with:

- Regulators
  - Institutional partners
  - Investors
  - Sovereign entities
  - Jurisdictional requirements

---

## ## 1. Institutional Tone

All content must maintain:

- Formal, disciplined language
- Zero hype
- No promotional claims
- Clear definitions
- Clear jurisdiction labeling

---

## ## 2. Legal Requirements

### Mandatory rules:

- No solicitation of securities
- No financial advice
- No forward-looking revenue claims
- No misrepresentation of entity status
- No promises of yield or returns

If a page references a subsidiary or product, it must state:

...

Status: Active / In Formation / Planned

Jurisdiction: USA / Portugal / Angola

...

---

## ## 3. Governance Approval Flow

Content updates must be approved by:

1. **Executive Chairman** (strategic coherence)
2. **CTO** (technical correctness)
3. **IR / Corporate** (legal + regulatory compliance)

---

## ## 4. EN/PT Parity

Every update must:

- Update EN + PT
  - Maintain identical structure
  - Maintain identical meaning
  - Update `PAGE\_LOCALE\_ROUTE\_MAP`

---

## ## 5. Version Control Discipline

- Every change must be PR-reviewed
  - PR description must include:
    - Purpose
    - Affected jurisdictions
    - Compliance impact
    - Validation steps

---

## ## 6. Content Stability

Pages that cannot change without approval:

- Corporate Structure
  - Leadership
  - Investor Relations
  - Subsidiaries
  - Trust & fiduciary structures
  - Regulatory alignment statements

---

## ## 7. Forbidden Content

- Token prices
  - Yield promises

- Investment guarantees
- Fundraising solicitations
- Technical claims not yet delivered

This protects you under US, EU, and Angolan law.

## 1. /docs/DEV-ONBOARDING.md

```
Developer Onboarding Manual
Biu-g Holdings Corporate Website
Version 1.0 - January 2025
```

```

```

```
Welcome
```

This document prepares developers to begin contributing to:

```
...
biu-gholdings.org
...
```

The project is designed to be:

- Static-first
- Zero-database
- Fully bilingual
- Regulator-friendly
- Easy to extend

This onboarding guide ensures **all** developers follow the same standards, maintain EN/PT parity, and respect corporate governance.

```

```

```
1. Technical Requirements
```

### ### Mandatory

- PHP 8.2+
- Composer
- Node.js 18+
- npm / pnpm / yarn
- Git
- Laravel knowledge
- React + Inertia.js knowledge

### ### Optional but recommended

- Docker (for isolated dev environment)
- VSCode + Inertia plugin
- Tailwind IntelliSense

---

## # 2. Clone & Install

```
```bash
git clone https://github.com/biu-g/biu-gholdings
cd biu-gholdings
composer install
npm install
```
```

---

## # 3. Run Development Environment

Backend:

```
```bash
php artisan serve
```
```

Frontend:

```
```bash
npm run dev
```
```

---

## # 4. Repository Structure

```
```
resources/
  js/
    Layouts/MainLayout.jsx
    Components/LanguageToggle.jsx
    Pages/...
docs/
routes/web.php
```
```

---

## # 5. Page Development Standards

### Every page must have:

1. **English component** → `Page.jsx`
2. **Portuguese component** → `PagePt.jsx`
3. **Two routes** → `page`, `page.pt`
4. **Language toggle map entries**

This guarantees EN/PT parity and regulatory compliance.

---

## # 6. How to Create a New Page (Step by Step)

### Step 1 – Create components

```
```
```

```
resources/js/Pages/NewPage.jsx
resources/js/Pages/NewPagePt.jsx
...
```

Step 2 – Add routes

```
```php
Route::get('/new-page',
fn()=>Inertia::render('NewPage'))->name('new.page');
Route::get('/nova-pagina',
fn()=>Inertia::render('NewPagePt'))->name('new.page.pt');
...`
```

### ### Step 3 – Update Language Toggle

Open:

```
...
resources/js/Components/LanguageToggle.jsx
...`
```

Add:

```
```js
NewPage: { en: 'new.page', pt: 'new.page.pt' },
NewPagePt: { en: 'new.page', pt: 'new.page.pt' },
...`
```

Step 4 – Test in browser

- Test EN → PT switch
- Test PT → EN switch
- Test direct URL access

7. Coding Rules

Component guidelines

- Use functional components
 - No inline CSS (use Tailwind)
 - Prefer small reusable blocks
 - Keep typography consistent
 - Keep content regulator-friendly

JSX formatting rules

- 2-space indentation
 - Named exports only
 - Top-level imports ordered alphabetically

8. Pull Request Rules

All PRs must contain:

- Purpose
 - Affected language files
 - Affected jurisdictions
 - Compliance impact
 - EN/PT verification checklist

Reviews required:

- CTO
 - Strategy
 - IR (if content changes)

9. Deployment Process

See `/docs/deployment-guide.md`.

10. Future Contribution Areas

- Media center
 - Governance hub
 - Regulator portal
 - IR document library
 - Subscriber dashboards

Each of these must follow the same EN/PT pair model.

Contact

For architecture or development questions:

****CTO – CubeShackles & Biu-g Holdings****

For governance or compliance questions:

****Executive Chairman – Biu-g Holdings LLC****

2. GitHub Issues Backlog (Copy–Paste)

Below is a complete backlog.

Just paste directly into GitHub → “New Issue” → repeat.

ISSUE 1 — Implement MainLayout.jsx

Create MainLayout with header, navigation, footer, language toggle, and title injection. Must serve as the global wrapper for all pages.

ISSUE 2 — Implement LanguageToggle.jsx

Create global EN/PT toggle using PAGE_LOCALE_ROUTE_MAP and Inertia page component names.

ISSUE 3 — Configure EN/PT Home Pages

Implement Home.jsx + HomePt.jsx with full content parity and layout.

ISSUE 4 — Configure EN/PT About Pages

Implement About.jsx + AboutPt.jsx. Ensure full regulatory tone.

ISSUE 5 — Leadership Pages

Implement Leadership.jsx + LeadershipPt.jsx. Include bios, governance philosophy.

ISSUE 6 — Corporate Structure Pages

Create the full multi-entity tree representation with status labels.

ISSUE 7 — Subsidiaries Pages

Add detailed subsidiary cards for all AO/PT/US companies.

ISSUE 8 — Investor Relations Pages

Implement IR content, disclaimers, capital structure, and contact.

ISSUE 9 — Contact Pages

Create frontend-only form. Add strategic contact panel.

ISSUE 10 — Add Footer Component

Minimal institutional footer with © year + Biu-g Holdings LLC.

ISSUE 11 — Add Page-404 Component

Custom 404 page in EN/PT linking back to main pages.

ISSUE 12 — Production Build & Deployment

Execute production build, deploy to server, configure Cloudflare SSL + caching.

ISSUE 13 — Documentation Sync

Ensure all /docs .md files match actual implementation.

ISSUE 14 — Governance Review

Approve all content via Executive Chairman + Strategy + IR before launch.

3. Milestones

Use these in GitHub → “Milestones”.

Milestone: v1.0 — Corporate Launch

Goal: Public launch of static corporate website.

Deadline: ± 7–14 days

Includes:

- Layout
- Home, About
- Leadership
- Corporate Structure
- Subsidiaries
- IR
- Contact
- EN/PT toggle
- Deployment
- Cloudflare

Milestone: v1.1 — Stakeholder Upgrade

Goal: Add regulator-facing & investor-facing depth.

Includes:

- Compliance Center
 - Governance page
 - Document hub (PDFs)
 - Annual stakeholder letters
 - Press Kits
-

Milestone: v2.0 — Institutional Portal

Goal: Transition from static website to corporate platform.

Includes:

- Investor Portal (login)
 - Regulator dashboards
 - Document vault
 - Tokenized access levels
 - Biu-g Academy integration
 - API documentation portal
-

4. Figma UI Kit Specification

This is what your designer or CTO uses to build consistent UI across all pages.

```
# Biu-g Holdings – UI Kit Specification
```

```
## For Figma / Frontend Consistency
```

```
---
```

```
## 1. Color Palette (Institutional)
```

Primary

- ****Dark Black****: `#111111`
- ****Slate Gray****: `#374151`
- ****Soft Gray****: `#6B7280`

Background

- ****Paper White****: `#FFFFFF`
- ****Neutral 50****: `#F9FADF`

Border

- `#E5E7EB`

2. Typography

Font

****Inter**** (primary)

- Modern
- Institutional
- Figma-ready

Sizes

- H1: 32–40px
- H2: 24–30px
- H3: 18–20px
- Body: 14–16px
- Small text: 12–13px

Weight

- Regular 400
- Medium 500
- Semibold 600

3. Grid & Spacing

- Container width: ****max 1280px****
- Section spacing: ****48px-64px vertical****
- Grid gap: ****16px****
- Padding: ****16px (mobile)****, ****32px (desktop)****

4. Components

Page Header Block

- Section label (uppercase, 0.2em tracking)
 - Title
 - Description paragraph

Content Card

- White background
 - 1px border
 - Rounded corners: 8px
 - Padding: 16-20px

Navigation Bar

- Right-aligned language toggle
 - Left-aligned brand logo

Footer

- Minimalist
 - Centered text
 - © Biu-g Holdings LLC

5. Figma Export Notes

Create the following component sets:

- Buttons (primary/secondary)
- Cards (small/large)
- Typography styles
- Grid styles

- Navigation bar
 - Footer
-

5. PDF Compilation Note (for CTO)

Give your CTO this exact instruction:

To generate the internal manual PDF:

1. Open all docs in /docs/
 2. Compile into a single PDF in the following order:
 - README.md (root)
 - site-architecture.md
 - cto-checklist.md
 - dev-onboarding.md
 - deployment-guide.md
 - sitemap-diagram.md
 - content-governance.md
 3. Name the file: `Biu-g_Corporate_Web_Manual_v1.pdf`
 4. Upload to internal drive for review.
-
